ADULT & ADOLESCENT SUBSTANCE ABUSE PROGRAM

ADULT & ADOLESCENT SUBSTANCE ABUSE PROGRAM

Help. Hope. Healing.

Young House Family Services has provided services to children and families since 1971, and is located in Burlington, IA.

The Adult & Adolescent Substance Abuse Program (ASAP) offers outpatient treatment to individuals in need of substance abuse services in southeastern Iowa. We currently have two offices, one in Burlington and the other in Mt. Pleasant, but can provide services in other locales. Services can also be provided in your child's school during non-academic times.

We believe that alcohol and chemical addictions are diseases, and we utilize a treatment model which builds upon the 12 step programs of Alcoholics Anonymous and Narcotics Anonymous. All services are based on the American Society of Addiction Medicine (ASAM).

Iowa Department of Transportation OWI Assessments are \$125.00 (cash only), and must be paid before the assessment. Department of Transportation affiliated partnering.

Funding

ASAP utilizes several funding streams including Medicaid, some private insurance and private pay arrangements. Our staff will work with you and your payment source to ensure the best possible treatment outcomes.

Treatment Team

All substance abuse treatment services are provided by Certified Alcohol & Drug Counselors (CADC).

ASAP believes families are an essential part of the recovery process, and they are considered an important part of the Treatment Team. Families are encouraged to take part in all steps of the treatment process.

Outpatient Treatment Extended/Intensive

- The length and intensity of outpatient treatment varies for each client based on their needs.
- Individual outpatient sessions are included in treatment and the frequency of sessions is based on individualized treatment needs.
- Group outpatient sessions are available and assist clients with understanding and accountability.
- Family outpatient groups are available to enhance family communication and relationships.
- It is an expectation of ASAP that clients comply with random Urinalysis (UA) tests to screen for the use of illegal drugs. Ongoing drug screening monitors a client's compliance with the recovery process.

"...Our primary goal is to improve the lives of children and families."
